INDEPENDENT GROCERS' ALLIANCE OF AMERICA

1500-000 Fish Yearly Expected From New Hatching Station
MONTGOMERY, Ala., Sept. 15.—Officials of the State Department of Game and Fisheries anticipate an annual output of approximately 1,000,000 fish at the state hatchery near Anniston.

The hatchery recently was furnished with a large quantity of the most delicate and placed under the supervision of G. S. Black, former of the United States Bureau of Fisheries.

Sponsored by sportsmen of Calhoun, Tallapoosa and Etowah Counties and by the Chambers of Commerce at Anniston and Tallapoosa, construction of the hatchery was started in 1925 and since that time it has averaged annually 100,000 fingerlings.

With the completion of the project six new ponds were placed in operation and the five old ones greatly improved. Five of the ponds measure 400 feet in length by 100 feet wide, while the others vary in size.

An improved dam has been built to supply the ponds with spring water and an independent canal makes possible the lowering of any pond in the hatchery without affecting the others.

Completion of the hatchery marked another milestone in Alabama's growth as a sport center, for officials of the department have been pointing to present plans for holding annually spring and deep-sea fishing contests in this state.

NOTICE
We can lend money on well-improved and well-located farm land to supply the ponds with spring water, 10 and 20 years. If interested see J. N. Ham or J. Lawrence Ham, Elba, Alabama.

Redpath Chautauqua Is Using Chevrolet Sedans

For the first time in its sixteen years existence Redpath Chautauqua is this year employing passenger cars to transport the members of its DeLuxe circuit. Buses and trains have been used in the past, but the comfort that the passenger car alone affords accounted for its ultimate selection.

The cars are Chevrolet six-cylinder sedans and the task to which they are placed in transporting "tag and baggage" the 10 members of the company is indeed a formidable one. The itinerary of the group trails jaggedly from Florida to northern Wisconsin. The tour started April 1 and will not conclude until September at which time approximately 7,000 miles will have been traversed. Unless one has traveled with a Chautauqua troupe it is almost impossible to realize the rigors entailed by travel of this sort. In the first place, the troupe are in the strictest sense not really troupe, but because of an outstanding reputation are drafted to traverse the smaller cities, many experiencing the life of the road for the first time.

Among the celebrities who are traveling by Chevrolet this year over the DeLuxe circuit are Mrs. Nellie Talor Ross, former governor of Wyoming; Anne Campbell, the celebrated newspaper poet and Captain Dennis Rook, former British Army ace and holder of the world's record for the longest safe flight, a trip from London to India, a distance of 7,000 miles.

For four months now the Redpath troupe have been making their one night stands and then hopping on to the next showing place. The 12 Chevrolets have never failed to get their occupants to their destination at the appointed time. Already more than 100 towns in a dozen states have been visited. When the tour ends 340 towns will have been visited.

Redpath is perhaps the best known Chautauqua in the country. About five years ago it gave up almost altogether the custom of traveling by train. Awakenings at early hours to catch trains resulted in jaded nerves and sometimes in missed engagements. Later, until this year, large buses have been used with an occasional passenger car here and there.

Not only do the Redpath Chevrolets transport the troupe, but they also serve as baggage cars. All of the luggage is loaded in trunks placed in racks in the rear. The huge tent weighing nearly a ton is the only piece of equipment not carried by Chevrolets. This goes by train.

The average jump between show points is 100 miles. There are no afternoon and evening performances. A departure shortly before noon allows ample chance for rest. Then the smooth running Chevrolet slices off the hundred miles comfortably in the intervening three hours. There is none of the hurry or bustle that characterized these jumps when they were made by train.
